

CLASSIFIER High Efficiency for High Volume

The CM Classifier's unique design creates a more efficient classification of tire chips/shreds in a compact area. Over size material is re-circulated to the shredder repeatedly until they are cut to the proper size.

Features at a glance:

- Unique design ensures efficient operation
- Multiple size configuration
- High quality chip sizing with high volume
- Low maintenance
- Non-binding and non-jamming
- Center drive
- Sealed bearings
- Can be used with most types of shredders
- Designed for maximum space utilization
